SUMMARY

Results-driven Full Stack Developer with **5+ years** of experience specializing in React.js, NestJS, Next.js, and enterprise-level architecture. Proven record of delivering secure, scalable web applications with performance optimizations up to 90%. Experienced in working with international clients including SanDisk (USA) and Nova Scotia Government (Canada). Currently working remotely under **contract and open to relocation (UAE/Kuwait/Middle East)**. Strong expertise in full lifecycle development, production deployments, cloud-based solutions, and D3.js-driven data visualizations. Passionate about building high-performance applications and modern UI/UX. **EXPERIENCE**

EXPERIENCE AND PROJECT DETAILS

Dew Software Pvt. Ltd.

Client: SanDisk – USA

Full Stack Developer | Nov 2024 – Present

• **Remote / India**

- ✓ Designed and developed proposed org-chart KPI dashboard for the SanDisk PIE platform using React, Next.js and D3.js.
- ✓ Built secure role-based access control system with SSO authentication and group-level permissions, supporting page-based authorization for 10K+ active PIE users. Led full backend development using NestJS, integrating Oracle and Tableau as the sole developer.
- ✓ Migrated Node.js runtime from v14 to v20, reducing page load times by 60–70%.
- ✓ Handled development-to-deployment workflows using Linux server setup with Docker (RedHat) and Git version control.
- ✓ Executed production data migration using SQLite package with zero downtime.
- ✓ Managed critical PIE application updates during Western Digital to SanDisk transition including brand configuration.

Sixth Force Solution Pvt. Ltd.

Client: Nova Scotia – Canada

Senior Software Engineer | Jun 2021 – Apr 2024

• **Chennai / India**

- ✓ **Led development of Prolaborate EA visualization platform using Angular and D3.js.**
 - ✓ Migrated from Angular 16 to 18, improving UI performance and modular architecture.
 - ✓ Developed customizable dashboards with role-based access control and chatbot integration.
 - ✓ Optimized backend data using Oracle stored procedures and SQL queries.
-

- ✓ Managed 5-member team delivering multiple web platforms with UI/UX, branding and event websites.
- ✓ Delivered 6+ websites with rapid execution under time-sensitive conditions.

Goandroy Technologies Pvt. Ltd.

Client: Multiple Indian Clients

Software Engineer | Aug 2019 – Sep 2020

• **Chennai / India**

- ✓ Developed airline operations dashboards and REST APIs using PHP CodeIgniter.
- ✓ Built and deployed multi-tenant applications on Windows on-premise servers.
- ✓ Delivered 10+ enterprise websites using PHP/CodeIgniter and WordPress.
- ✓ Led Angular + Figma UI prototyping for e-commerce platform.
- ✓ Designed logos, UI banners and branding elements.

ATK Techsoft Pvt. Ltd.

Software Engineer (Fresher) | Sep 2018 – Apr 2019

• **Bangalore / India**

- ✓ Developed responsive web apps using PHP, WordPress, HTML, CSS, JavaScript and jQuery.
- ✓ Built hotel booking application with cPanel hosting.
- ✓ Delivered 10+ websites handling UI to deployment.
- ✓ Created mobile UI prototypes using Flutter.
- ✓ Designed logos and branding assets using Adobe tools.
